

CoreIDRAW Lockerboard Student Guide

CoreIDRAW 2019 | For Form 1 students

Your task

Create an 80 mm x 40 mm lockerboard with your name, class symbol and a black-and-white picture. Then submit an AI file and the original CDR file.

Read the pages in order and complete one small part at a time.
Use the final checklist before submitting your work.

BEFORE YOU START

Know what you will make

The task has 8 small steps. You will finish with two files.

1 Create file A4, CMYK, 300 dpi	2 Draw frame Rectangle 80 mm x 40 mm
3 Add text Name and class symbol	4 Prepare picture Download and convert to SVG
5 Place picture Drag in, resize and arrange	6 Export AI U: -> Class -> 1A -> personal folder
7 Save CDR Keep an editable original	8 Final check Check folder and file types

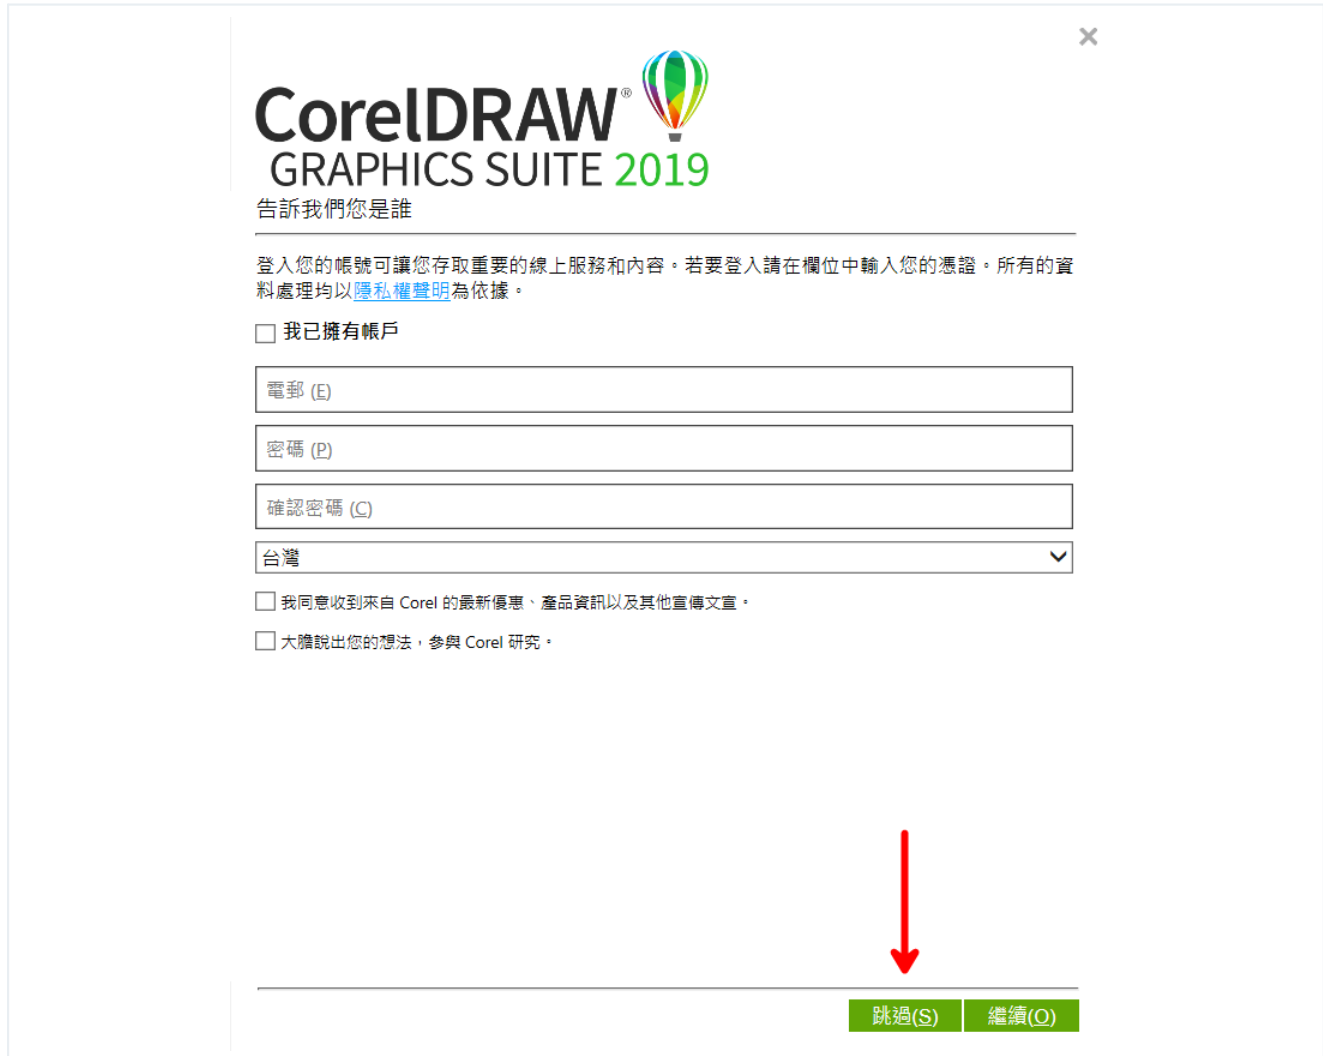

File name Use the same name for both files, for example 1a01_lockerboard. The extensions will be .ai and .cdr.

STEP 0 | FIRST TIME ONLY

Open CorelDRAW for the first time

If this screen does not appear, go to the next page.

STEP 0 On the welcome screen, click Skip or Continue to enter CorelDRAW.

Figure 1.png | First-use welcome and sign-in screen

Note Signing in is not required for this lockerboard task. Do not write any account details or passwords in the guide.

STEP 1 | CREATE A FILE

Create a new CorelDRAW document

Set the page and colour settings before you start drawing.

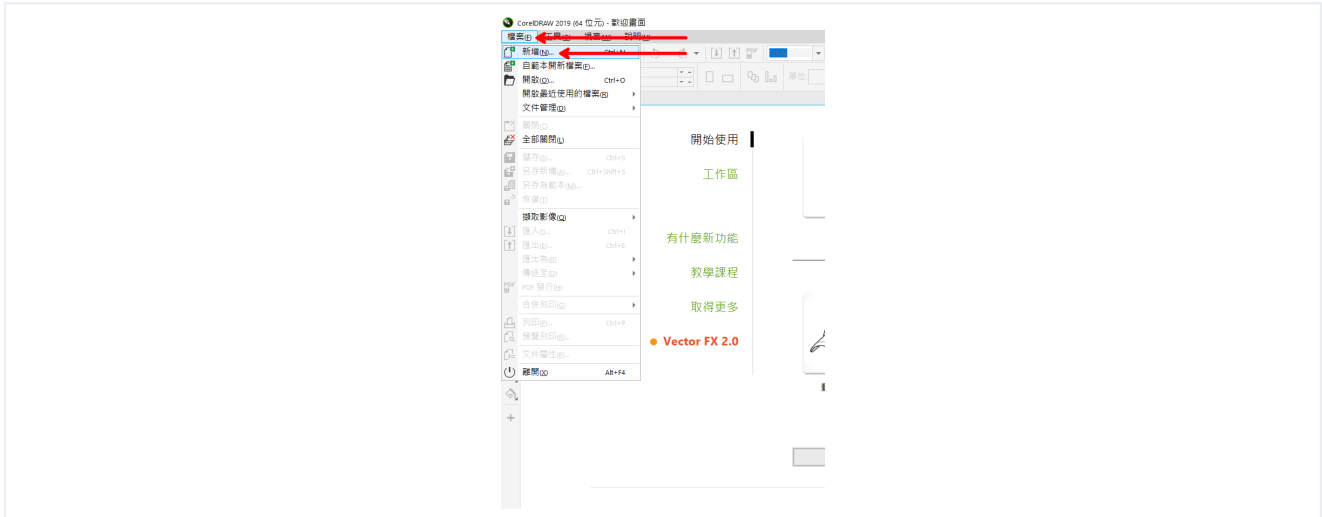

STEP 1A Click File -> New.

Figure 2.png | Open the File menu and choose New

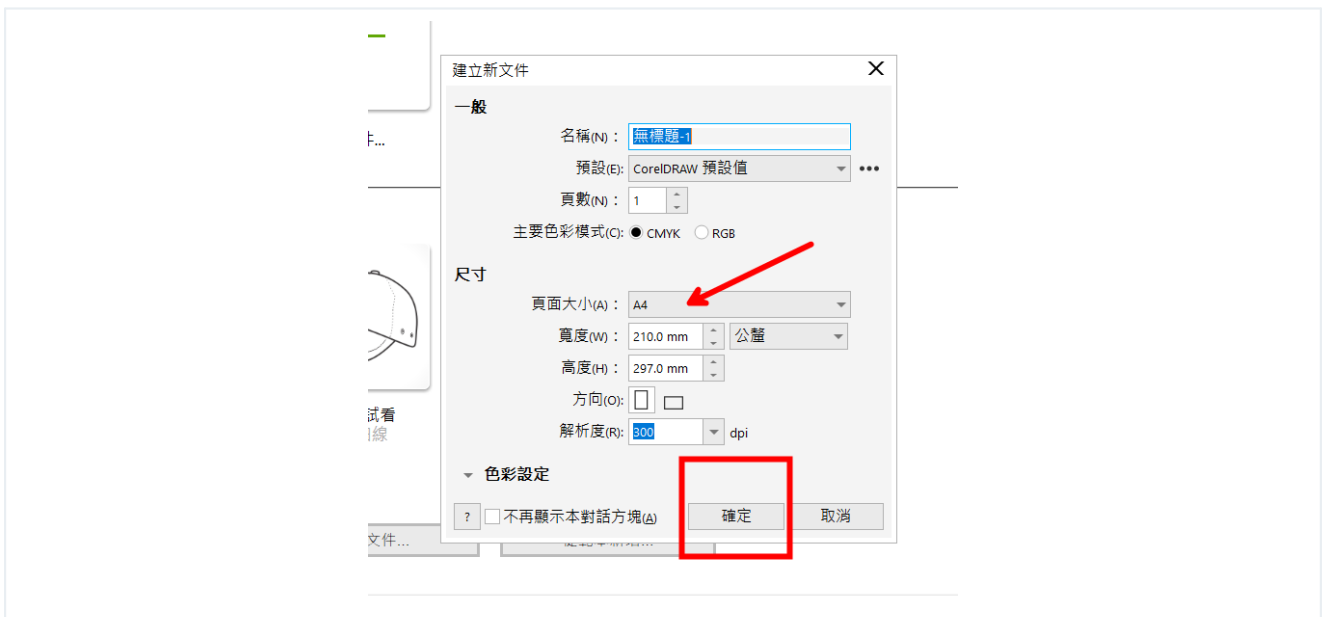

STEP 1B Choose A4, CMYK and 300 dpi, then click OK.

Figure 3.png | New document settings

STEP 2 | MAKE THE FRAME

Draw the lockerboard frame

The frame size is 80 mm x 40 mm.

STEP 2A Choose the Rectangle tool from the left toolbar. The shortcut is F6.

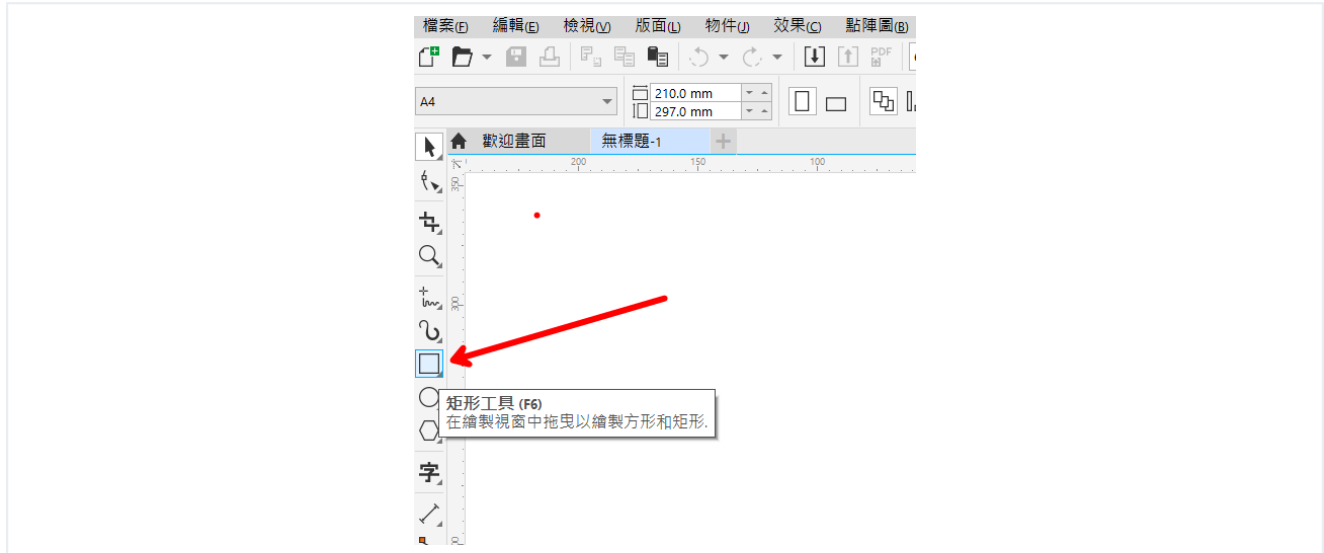

Figure 4.png | Choose Rectangle tool F6

STEP 2B Drag a rectangle on the page. Then enter 80.0 mm for width and 40.0 mm for height in the top toolbar.

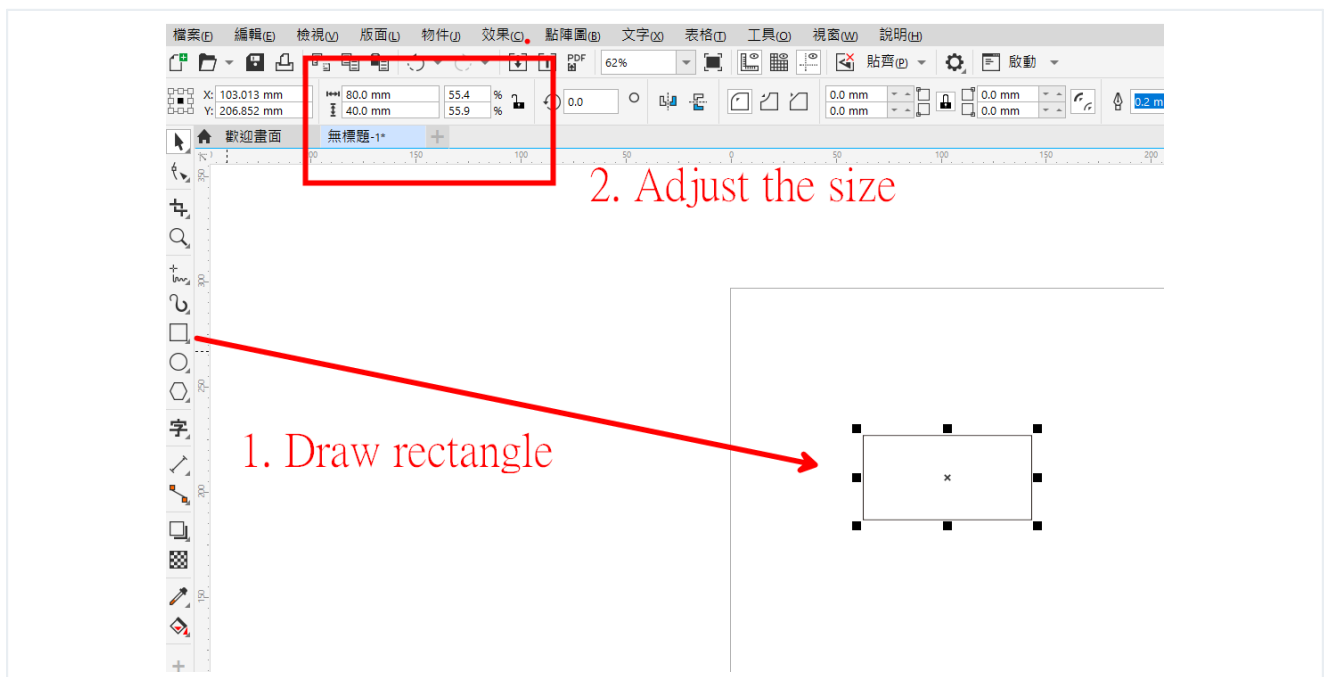

Figure 5.png | Set the rectangle width and height

STEP 3 | ADD TEXT

Add your name and class symbol

Type your name first, then add the circled number for your class.

STEP 3A Choose the Text tool and type your name inside the rectangle. Bernard MT Condensed at about 48 pt can be used.

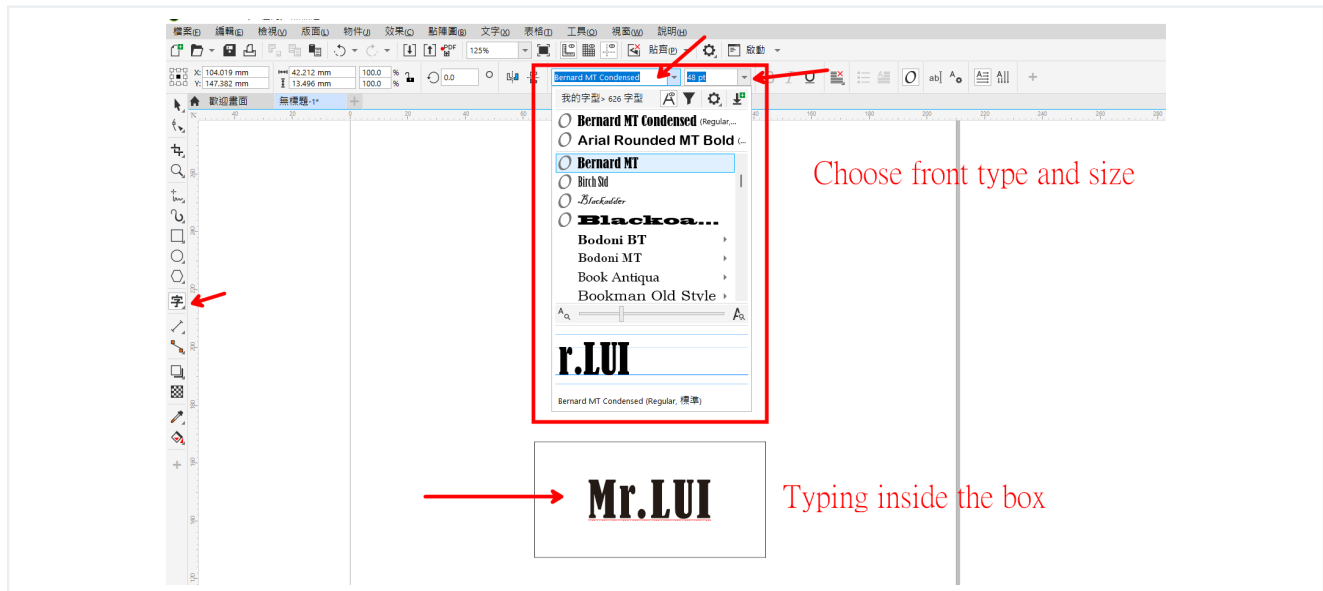

Figure 6.png | Choose font, size and type the name

STEP 3B Open the Character tool from the Text menu, choose the symbol you need, such as ③, and drag it into the design.

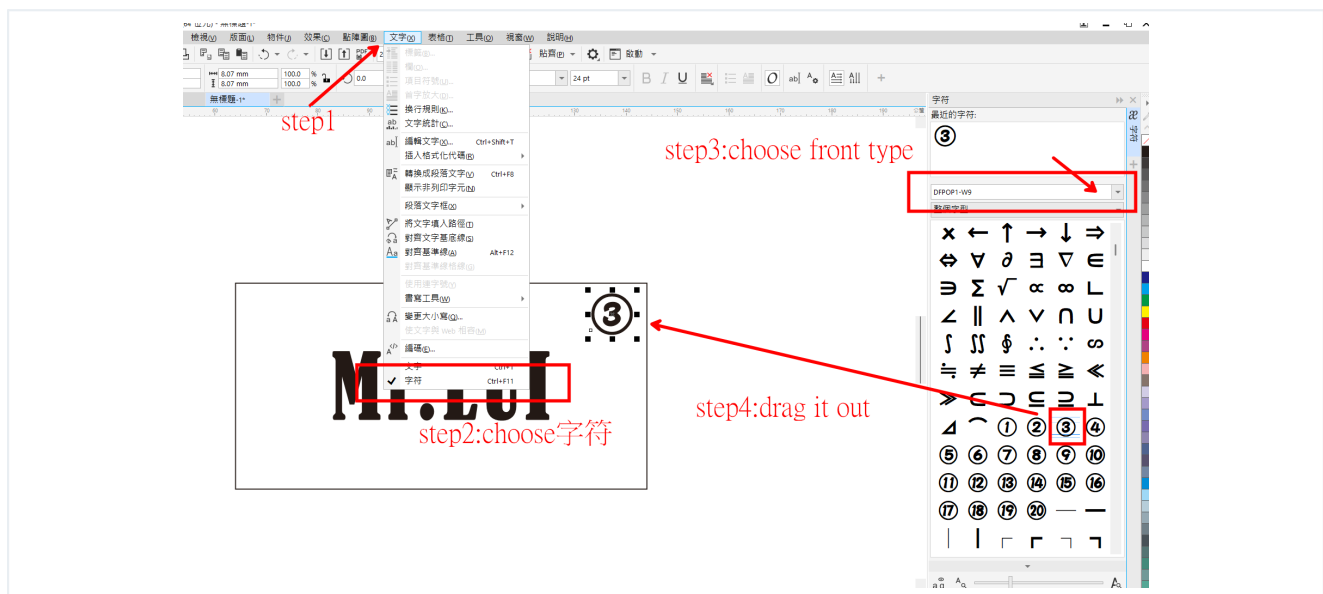

Figure 7.png | Choose a circled number and drag it into the design

STEP 4A | PREPARE PICTURE

Search for and download a picture

The example uses Google Images. Use a picture approved by your teacher or one you are allowed to use.

STEP 4A Search Google Images for a subject, such as Rex.

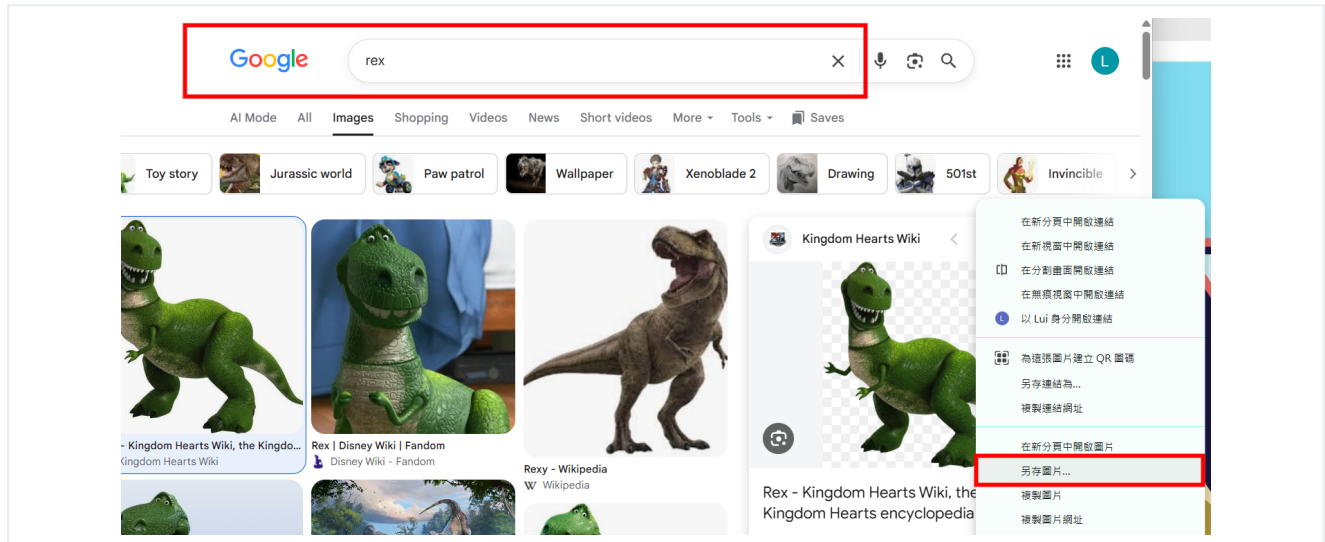

Figure 8.png | Search for a picture in Google

STEP 4B Right-click the picture and choose Save image as. Save it somewhere easy to find, such as the Desktop.

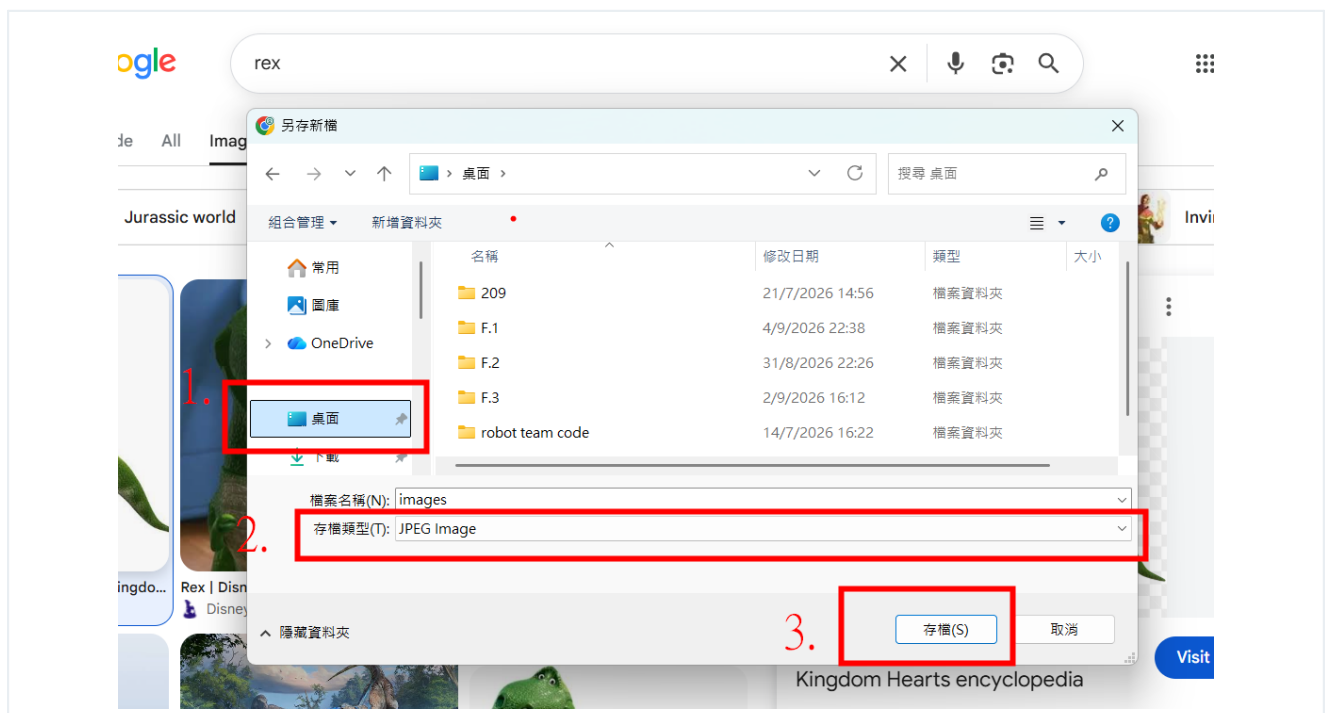

Figure 9.png | Save the picture to the Desktop

STEP 4B | FORMAT REMINDER

Check the picture format

Download the picture as JPG or PNG so it can be processed.

STEP 4C Choose JPEG Image or PNG Image in the file type list. Do not use WebP.

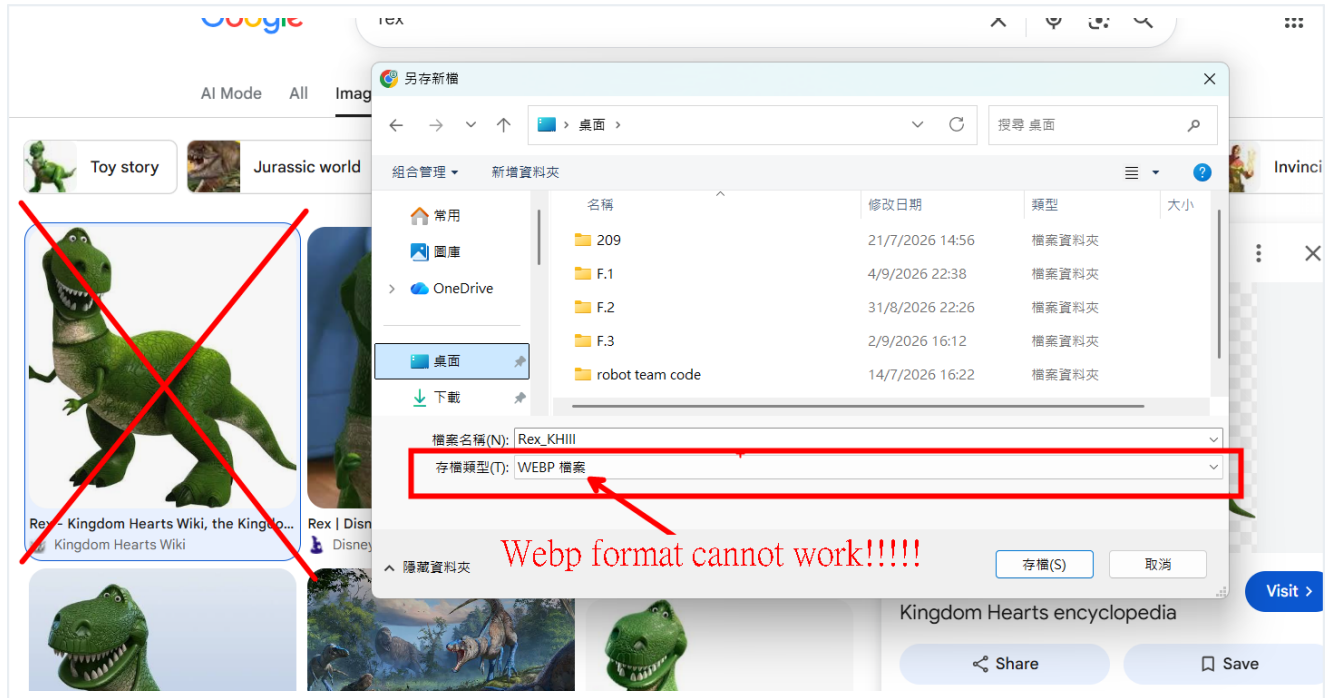

Figure 10.png | Example of an unusable WebP format

Remember If you see WebP, click Cancel and save again as JPG or PNG.

Next, Cute Cutter will turn the picture into a black-and-white SVG.

STEP 4C | UPLOAD PICTURE

Upload the picture to Cute Cutter

Cute Cutter helps turn the picture into an easy-to-use black-and-white design.

STEP 4D Open Cute Cutter, sign in and click Upload New Image.

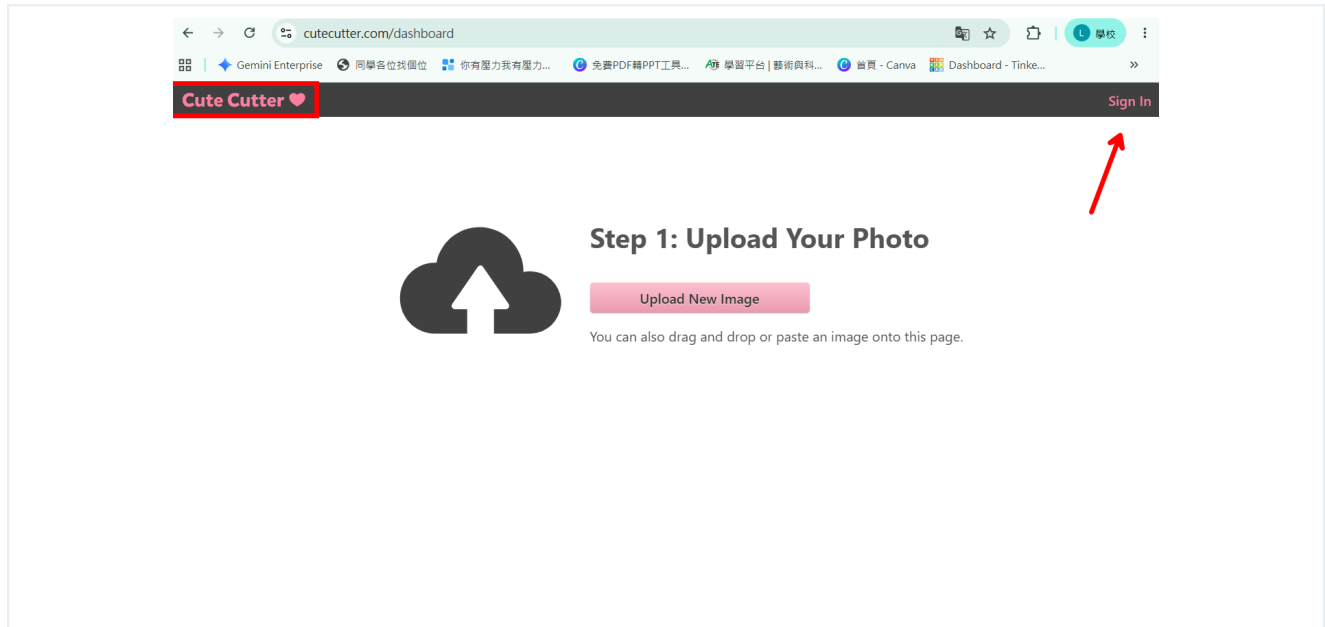

Figure 11.png | Cute Cutter upload page

STEP 4E In the file window, choose the JPG or PNG you downloaded, then click Open.

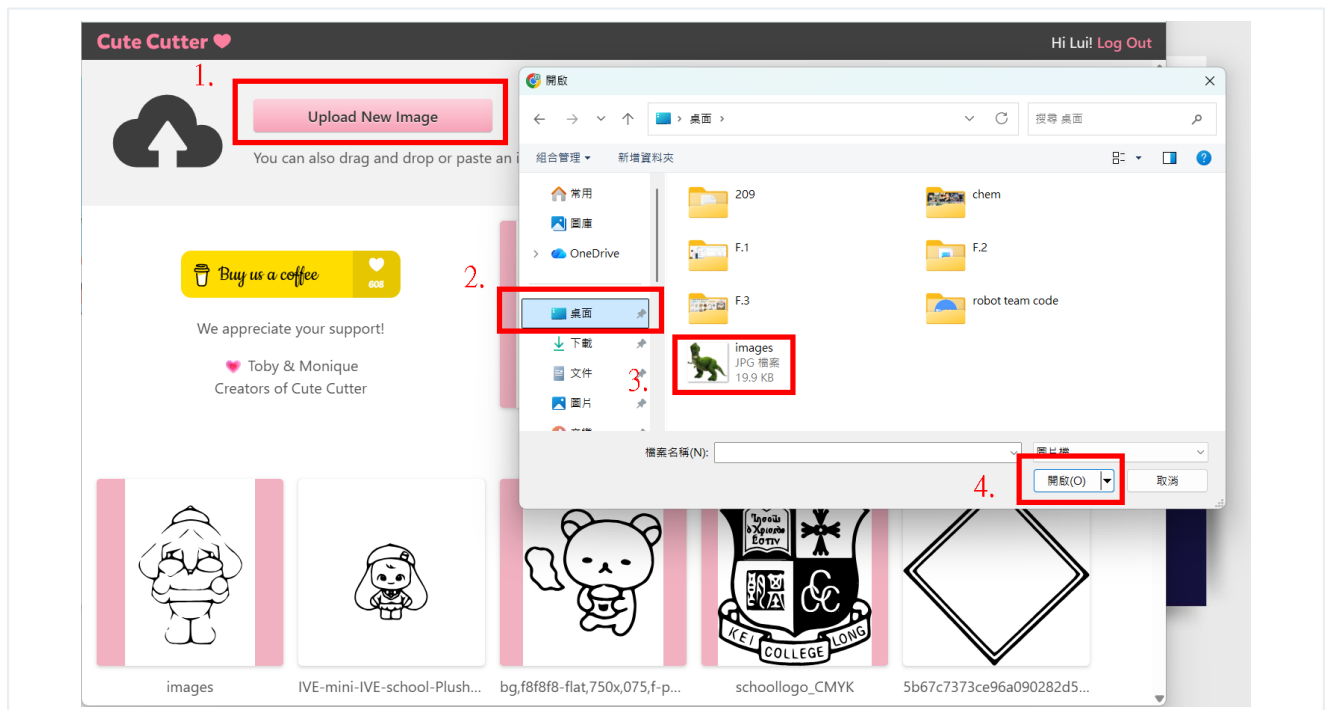

Figure 12.png | Choose the picture and click Open

STEP 4D | MAKE SVG

Adjust the black-and-white effect and download SVG

Adjust the picture until the black and white areas are clear.

STEP 4F Adjust the Blur, Edge Contrast and Threshold sliders until the design is clear. Then click Download.

Figure 13.png | Adjust the black-and-white effect and download

STEP 4G Choose SVG as the file format, then download it.

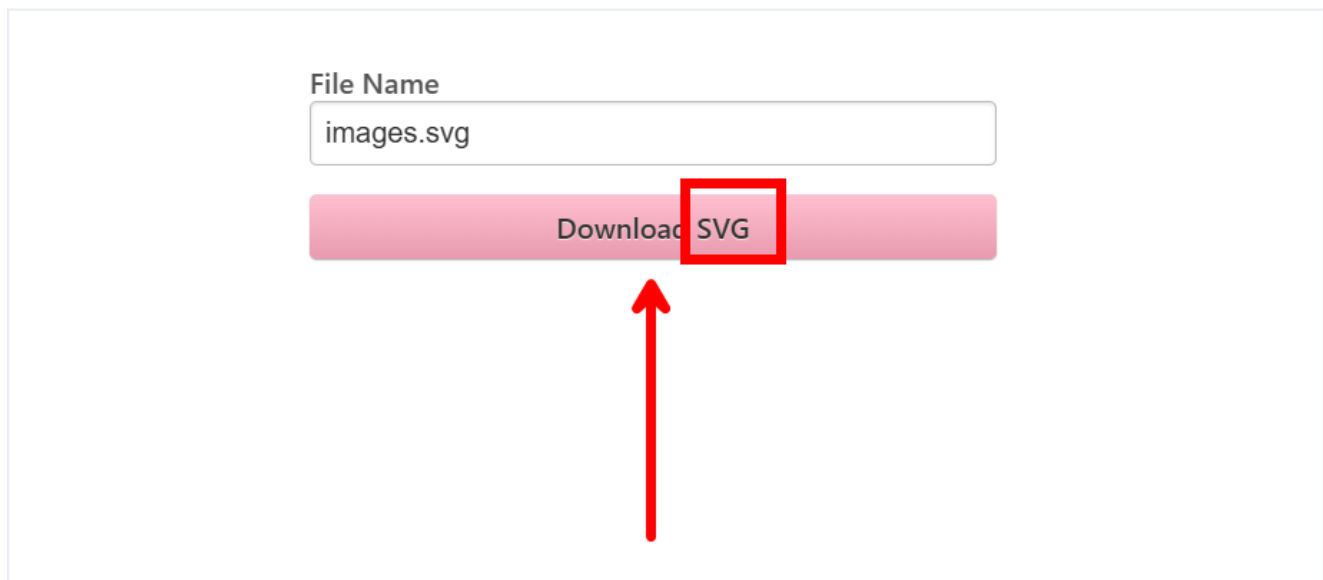

Figure 14.png | Choose Download SVG

STEP 5 | PLACE PICTURE

Put the SVG into the lockerboard

Place the downloaded SVG inside the rectangle and resize it.

STEP 5A Open the browser downloads list and drag the SVG file into the CorelDRAW rectangle.

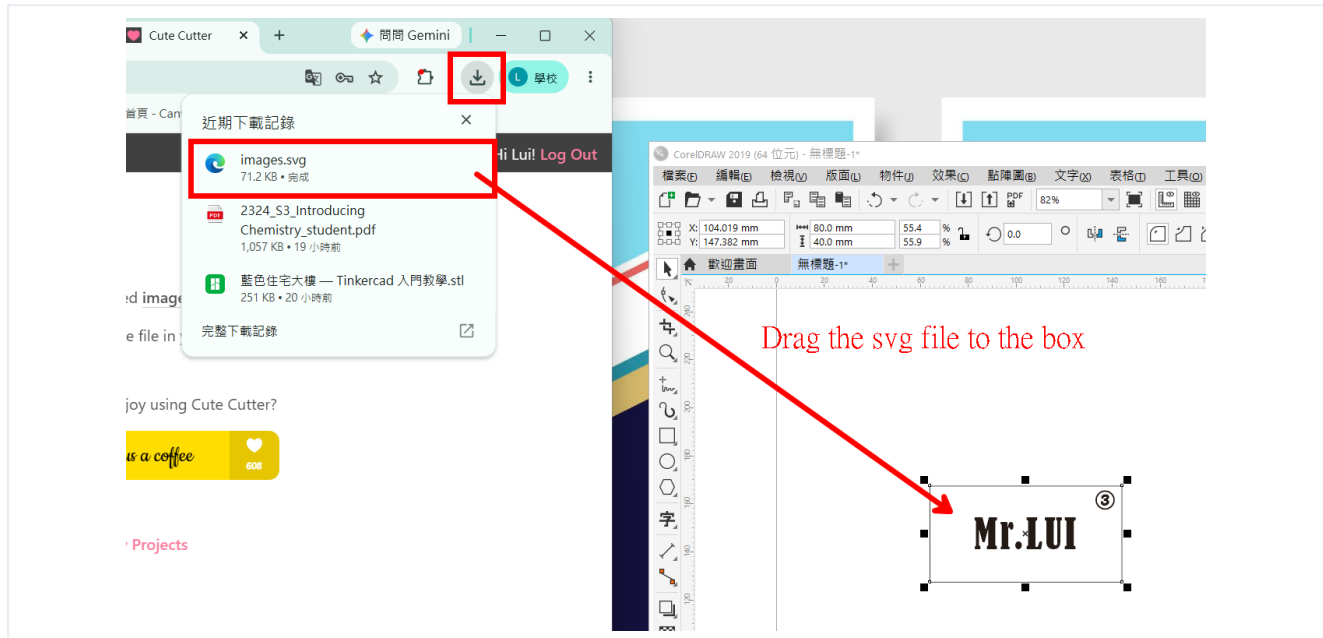

Figure 15.png | Drag the SVG from Downloads into CorelDRAW

STEP 5B Select the picture. Hold Shift and drag a corner handle to resize it without changing its shape.

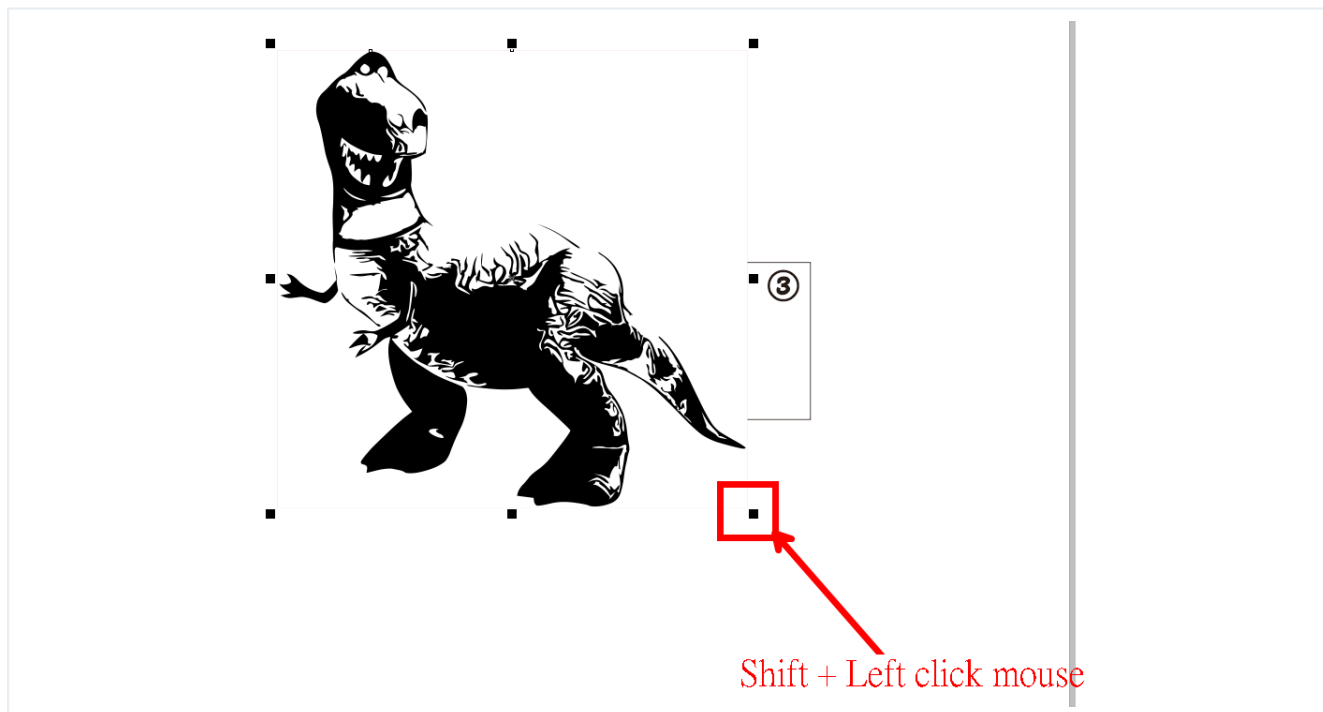

Figure 16.png | Resize the picture with a corner handle

STEP 6 | EXPORT AI

Start exporting the AI file

The AI file is the file you submit. Finish the design before exporting.

STEP 6A Click File -> Export, or press Ctrl + E.

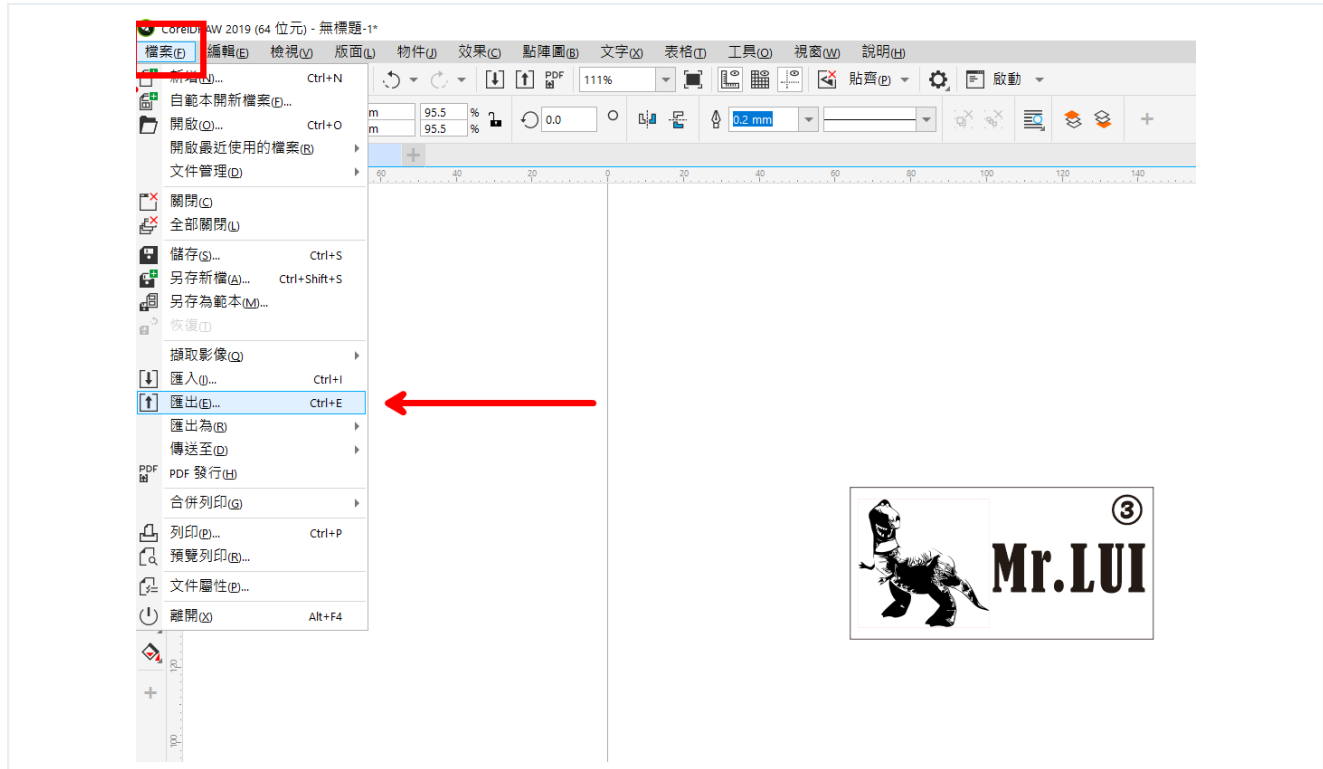

Figure 17.png | Choose Export from the File menu

File type Choose AI - Adobe Illustrator in the Export window.

STEP 6A | FIND FOLDER

Choose the required save location

Follow the school path to your personal folder.

STEP 6B In the Export window, choose the U: drive. Enter 1a01_lockerboard as the file name and choose AI - Adobe Illustrator.

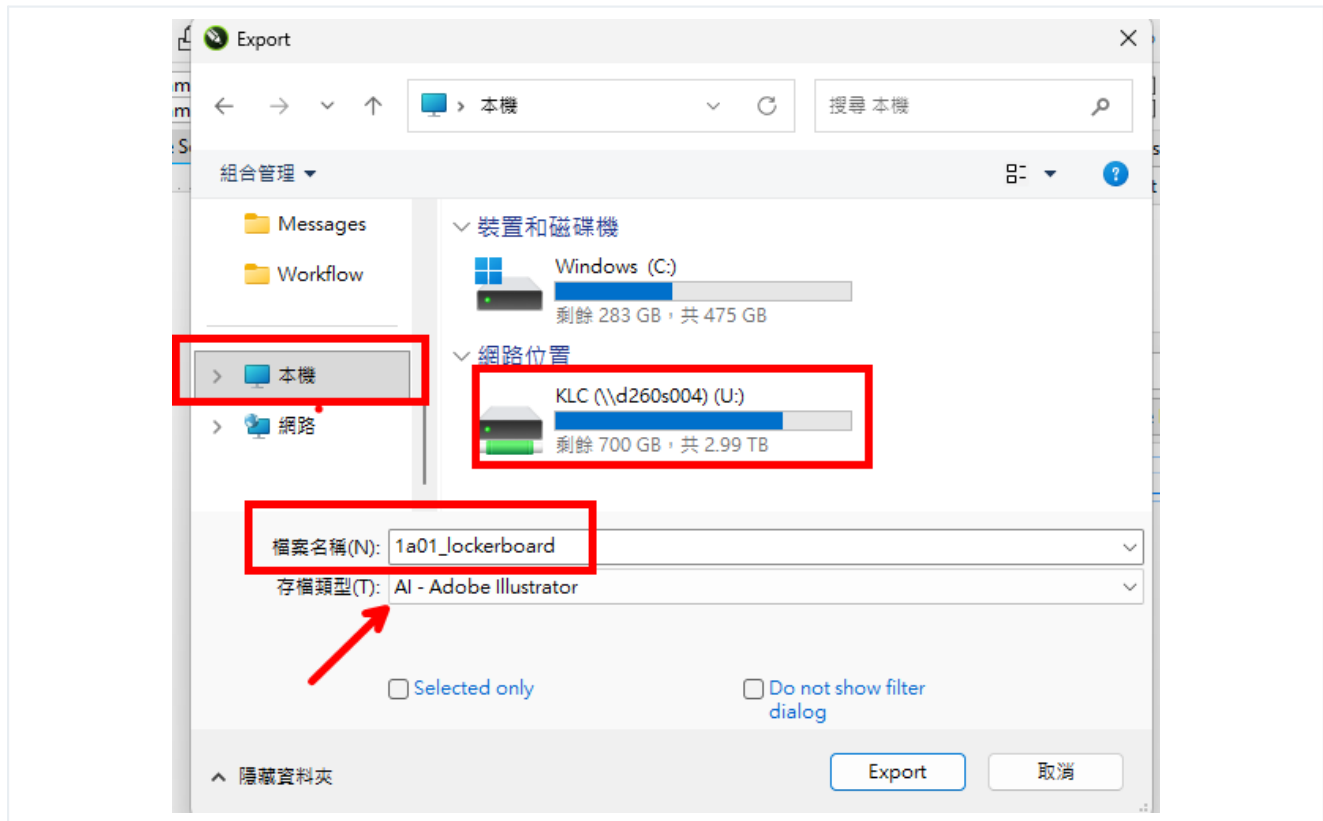

Figure 18.png | Choose U: drive, file name and AI format

STEP 6C Open Class, then open your class folder, for example 1A.

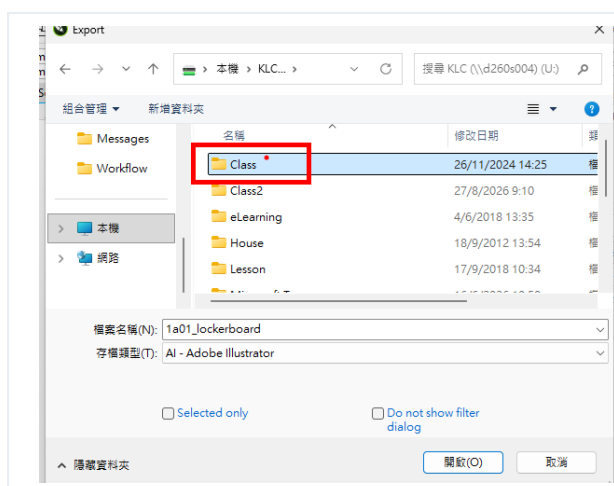

Figure 19.png | Open the Class folder

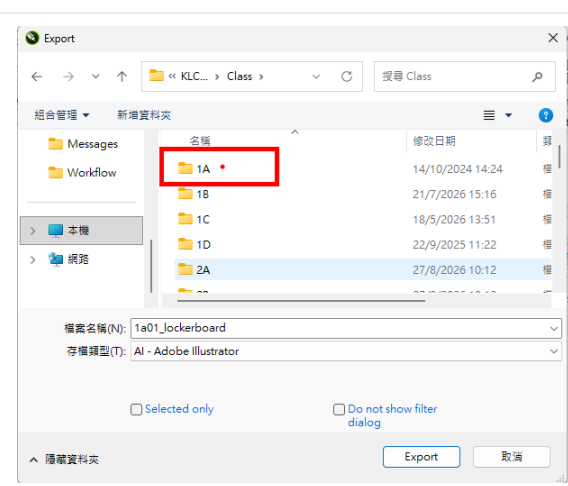

Figure 20.png | Open the 1A folder

STEP 6B | FINAL LOCATION

Open your personal folder and click Export

The last folder should be your personal number, for example 1a01.

STEP 6D Open your personal folder, such as 1a01. Check the path at the top, then click Export.

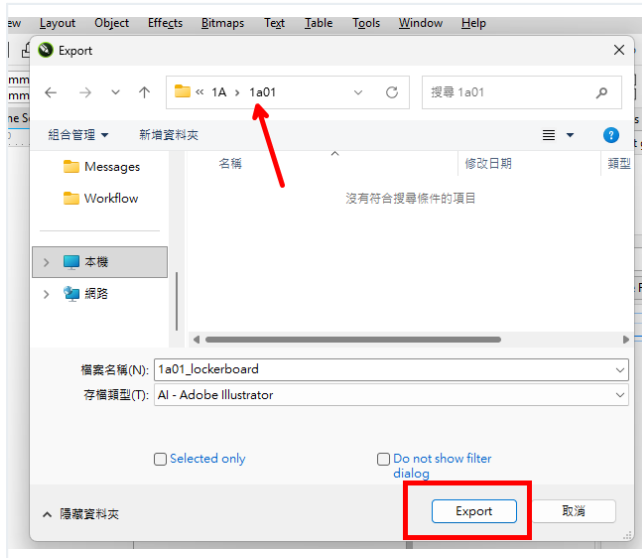

Figure 21.png | Open the 1a01 personal folder and click Export

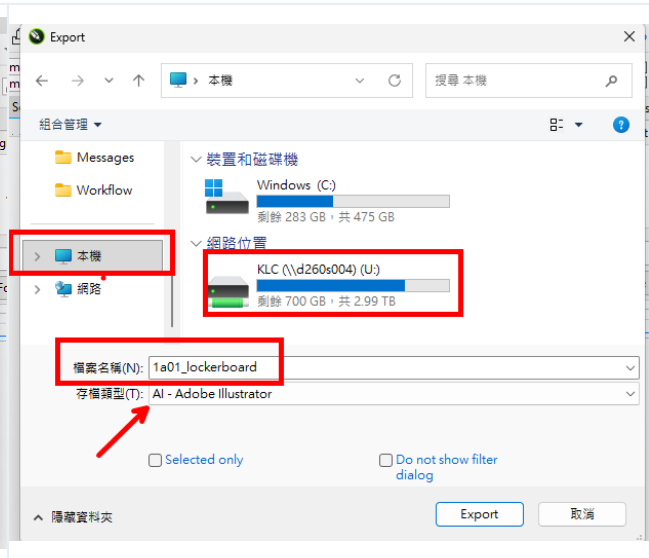

Figure 18.png | Check the file name and AI format

Correct path U:\Class\1A\1a01\1a01_lockerboard.ai

STEP 6C | AI SETTINGS

Set the AI export options

The Chinese and English windows have the same settings.

STEP 6E Set Export text as to Curves and tick Convert outlines to objects. Keep Include placed images and Include preview image selected, then click OK.

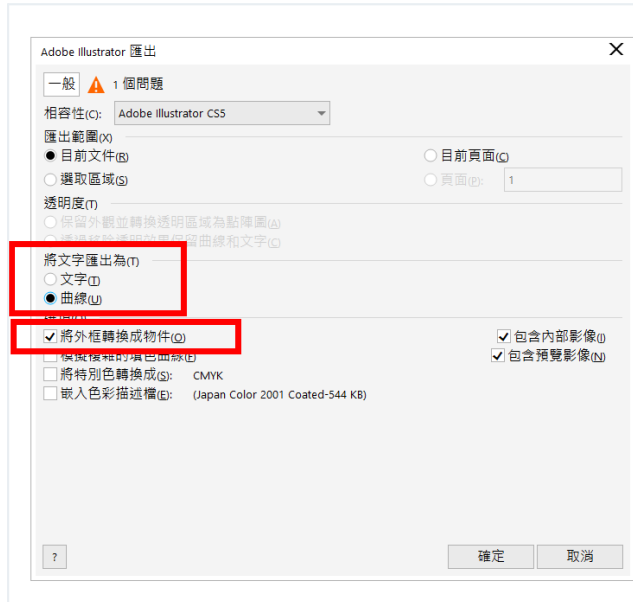

Figure 22a.png | Chinese AI export options

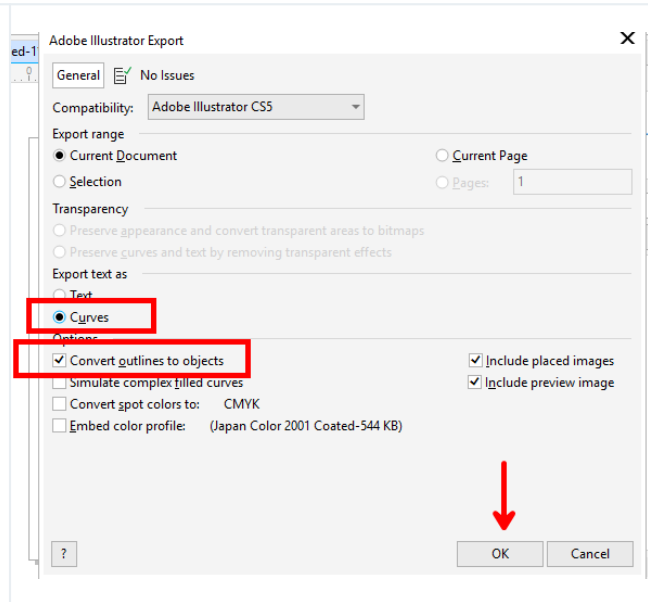

Figure 22b.png | English AI export options

Why choose Curves? Turning text into curves reduces changes caused by missing fonts on another computer.

STEP 7 | SAVE CDR

Save the original CDR file

The CDR file can be reopened and edited in CorelDRAW later.

STEP 7A In the same personal folder, use the file name 1a01_lockerboard, choose CDR - CorelDRAW as the file type, and click Save.

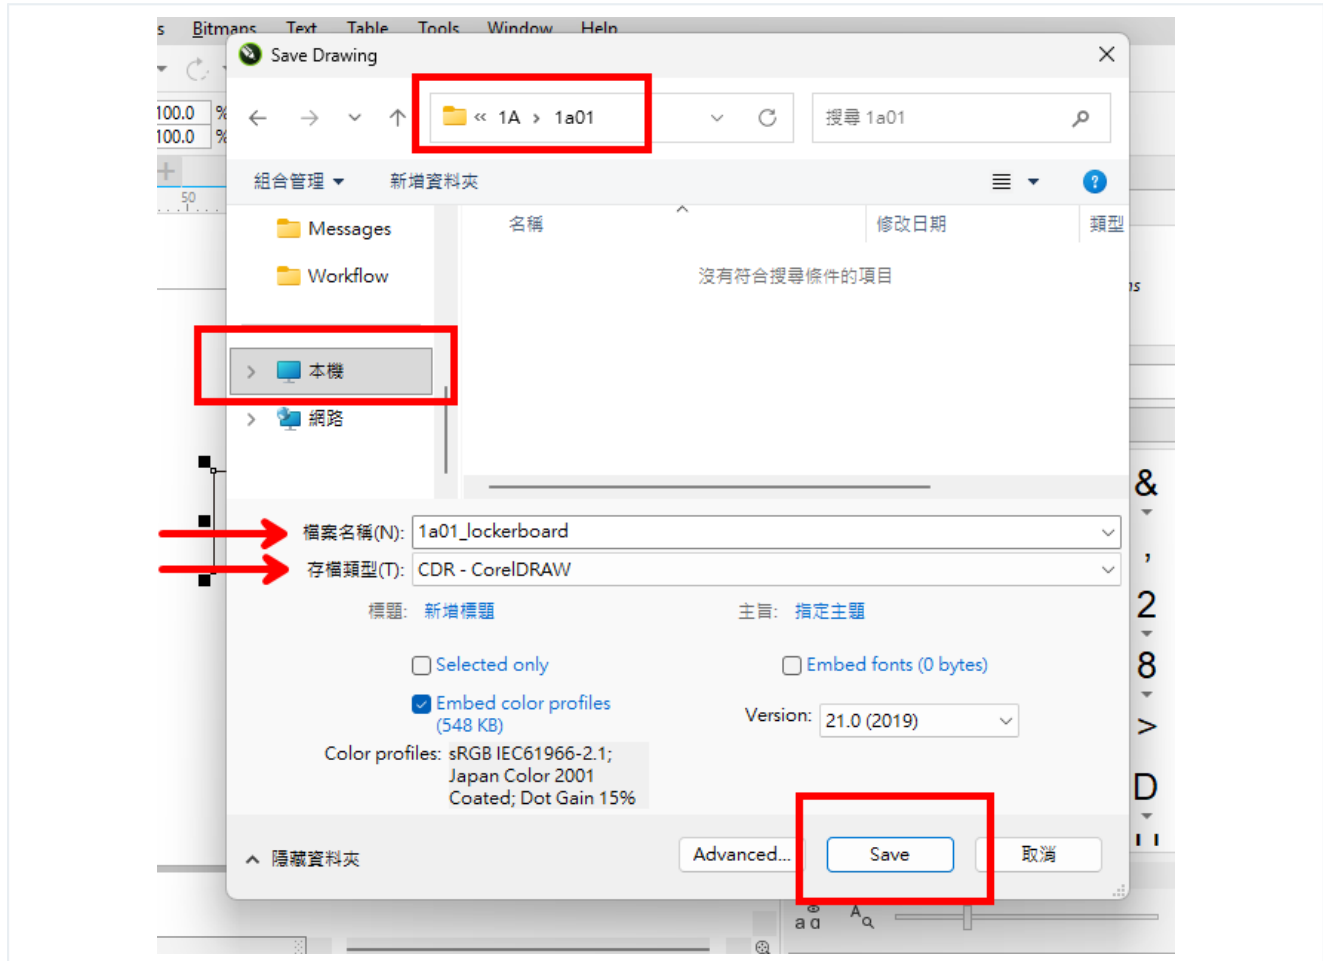

Figure 23.png | Save the CDR original in the required folder

Final result The folder should contain 1a01_lockerboard.ai and 1a01_lockerboard.cdr.

STEP 8 | CHECKLIST

Final submission checklist

Tick each item to make sure nothing is missing.

- ☐ The lockerboard size is 80 mm x 40 mm.
- ☐ The name and picture have been added.
- ☐ The picture is clear.
- ☐ The AI file has been exported.
- ☐ The CDR file has been saved.
- ☐ Both AI and CDR files are in the correct personal folder.
- ☐ The file name is correct.

Tip If you cannot find the AI or CDR file, check the file name, file type and folder path.

Finished! You have learned how to make a lockerboard in CorelDRAW and save the correct files.
